MUKESH PATEL SCHOOL OF TECHNOLOGY MANAGEMENT & ENGINEERING

Diya Arjnani

BTech in Information Technology

Date of Birth: 16/10/2005

Education

MPSTME, NMIMS University **2023 - 2027**
B. Tech in Information Technology
CGPA: 3.02

Carmel Convent Senior Secondary School **2021 - 2023**
CBSE: 61.6

Carmel Convent Senior Secondary School **2021**
CBSE: 88.8

Projects

Heart Disease Prediction using Machine Learning – 2024
Built and trained classification models (Logistic Regression, Random Forest) on clinical datasets to predict heart disease risk. Performed data preprocessing including handling missing values, normalization, and feature selection. Evaluated and compared models to determine the most effective predictive approach.

Global Suicide Rate Analysis (1985–2015) – 2024
Conducted exploratory data analysis on multi-country suicide datasets spanning 1985–2015, examining trends across age groups, gender, and economic indicators such as GDP. Created comparative visualizations to identify demographic and regional patterns. Derived insights highlighting high-risk groups and long-term temporal trends.

Usability Enhancement – Ladki Bahen Yojana Website – 2024
Performed heuristic evaluation to identify usability issues related to accessibility, navigation, and layout structure. Analyzed user flow and information architecture to detect design inefficiencies. Redesigned UI components and proposed structured improvements to enhance clarity, usability, and overall user experience.

Health Website with BMI Calculator – 2024
Developed a responsive health website featuring real-time BMI calculation using HTML, CSS, and JavaScript. Designed an interactive user interface to accept height and weight inputs with proper validation. Categorized users into underweight, normal, overweight, and obese based on BMI results.

Internships

IBM SkillsBuild – Project Based Learning Intern (Agentic AI) – Jul 2025 to Aug 2025
Completed a 4-week intensive program focused on AI agent architecture, LLM workflows, and prompt engineering. Built AI-driven mini projects and explored automation and decision-based AI systems in collaboration with CSRBOX Foundation.

Certifications & Publications

Agentic AI: From Learner to Builder – IBM SkillsBuild, 2025
Participant – Smart India Hackathon (SIH), 2025

CORE SKILLS

Technical Skills- Python, Java
Non-Technical Skills- Communication, Teamwork, Problem solving, Adaptability, Quick Learner.

Achievements and Position of Responsibility

Actively participated in inter-college sports events including Badminton and Box Cricket, demonstrating teamwork, discipline, and leadership under competitive environments.
